Modelling Phase Equilibria, Thermodynamic Optimization and Prediction

Synthetic approach to alloy thermodynamics and kinetics by cluster variation method and path probability method 1
T. Mohri, T. Nakahara, S. Takizawa and T. Suzuki (Sapporo, Japan)

Thermodynamic calculations in the Y–Al–C system 8
J. Gröbner, H.-L. Lukas and F. Aldinger (Stuttgart, Germany)

Thermodynamic evaluations of the systems Al–Si–Zn and Cu–Mg–Ni 15
M.H.G. Jacobs and P.J. Spencer (Aachen, Germany)

Experimental and thermodynamic assessment of the Fe–Zr system 19
C. Servant (Orsay, France), C. Gueneau (Le Fayet, France) and I. Ansara (Saint-Martin d'Hères, France)

The ternary system aluminum–gold–silicon 27
M. Hoch (Cincinnati, OH, USA)

Computer-aided thermodynamic study of solid Co–Pd alloys by knudsen cell mass spectrometry, and calculation of the phase diagram 32
H. Wang, M.S. Belegratis, J. Theiner and J. Tomiska (Wien, Austria)

Contributions to the modelling of the thermodynamic behaviour of Se–Te liquid solutions 39
M.T. Clavaguera-Mora, C. Comas (Bellaterra, Spain) and N. Clavaguera (Barcelona, Spain)

Thermodynamic modelling of solid gallium arsenide 48
W.A. Oates (Jülich, Germany), G. Eriksson (Aachen, Germany) and H. Wenzl (Jülich, Germany)

A theoretical study of the phase equilibria in the Cu–Cr–Zr system 53
K.J. Zeng and M. Hämäläinen (Espoo, Finland)

Formation Thermodynamics of Solid Alloys

The thermodynamic properties of calcium intermetallic compounds 62
M. Notin, J. Mejbar, A. Bouhajib, J. Charles and J. Hertz (Vandoeuvre-les-Nancy, France)

High temperature calorimetry: recent developments 76
C. Colinet (Saint Martin d'Hères, France)

Standard enthalpies of formation of some carbides, silicides and germanides of cerium and praseodymium 88
S.V. Meschel and O.J. Kleppa (Chicago, IL, USA)

Enthalpies of formation of solid Ni–Cr and Ni–V alloys by direct reaction calorimetry 94
A. Watson (Sheffield, UK) and F.H. Hayes (Manchester, UK)

Activity coefficients and partial molar volumes of boron in platinum–rhodium alloys 101
H. Brodowsky and M. Ketzner (Kiel, Germany)

On a simple high temperature direct reaction calorimeter 106
G. Cacciamani, G. Borzone and R. Ferro (Genova, Italy)

Thermodynamic investigation of the Lu–Pb system 111
G. Borzone, N. Parodi, R. Ferro (Genova, Italy), M. Gambino (Marseille, France), V. Vassiliev (Moscow, Russia) and J.P. Bros (Marseille, France)

Thermodynamic study of intermetallic phases in the Hf–Al system 117
G. Balducci, A. Ciccioli, G. Gigli, D. Gozzi (Roma, Italy) and U. Anselmi-Tamburini (Pavia, Italy)

Elsevier Science S.A.

Enthalpies of formation of solid Sm–Al alloys 122
G. Borzone, A.M. Cardinale, A. Saccone and R. Ferro (Genova, Italy)

Alloy Design

Calculation of the effect of alloying elements on the M_s temperature in steels 126
K. Ishida (Sendai, Japan)

Thermodynamics of particle coarsening 132
J.E. Morral (Storrs, CT, USA) and G.R. Purdy (Hamilton, Ont., Canada)

Thermodynamic and experimental study of Ti–Ag–Cu alloys. 136
M. Paulasto (Espoo, Finland), F.J.J. van Loo (Eindhoven, The Netherlands) and J.K. Kivilahti (Espoo, Finland)

Thermodynamics-based alloy design criteria for austenite stabilization and transformation toughening in the Fe–Ni–Co system 142
G.N. Haidemenopoulos (Volos, Greece), M. Grujicic (Clemson, SC, USA), G.B. Olson (Evanston, IL, USA) and M. Cohen (Cambridge, MA, USA)

Computer-assisted optimization of cobalt-base alloy compositions 148
P. Waldner, E. Königsberger and H. Gamsjäger (Leoben, Austria)

Experimental Determination of Phase Diagrams

Phase diagram, thermodynamic and transport properties of $Ag_{5-x}Te_3$ 152
M. Gobec and W. Sitte (Graz, Austria)

The phase diagrams of the Sc–Sn and Sc–Pb systems 157
A. Palenzona and P. Manfrinetti (Genova, Italy)

The interpolated Tm–Mg phase diagram 161
A. Saccone, D. Macciò, S. Delfino and R. Ferro (Genova, Italy)

Phase relationships at 500 °C in the Y–Pr–Mg system. 167
M. Giovannini, A. Saccone and R. Ferro (Genova, Italy)

Liquid Alloys

Heat capacity of liquid and undercooled liquid metals and alloys 174
F. Sommer (Stuttgart, Germany)

Isopiestic determination of the coefficients of activity of magnesium in Al–Cu–Mg liquid alloys 179
D. Soares (Guimarães, Portugal), L.F. Malheiros (Porto, Portugal), M. Hämäläinen (Espoo, Finland) and F. Castro (Guimarães, Portugal)

Thermodynamics and local atomic arrangements of gold–nickel alloys 182
M. Bienzle (Stuttgart, Germany), T. Oishi (Osaka, Japan) and F. Sommer (Stuttgart, Germany)

The limiting molar partial enthalpies of mixing of iron, cobalt, nickel, palladium and platinum in liquid gallium and indium. 189
P. Anres, R. Haddad, D. El Allam, M. Gaune-Escard, J.P. Bros (Marseille, France) and E. Hayer (Vienna, Austria)

The Fermi energy and the enthalpy of mixing 193
E. Hayer (Vienna, Austria) and J.-P. Bros (Marseille, France)

Non Equilibrium Phase Thermodynamics, Glassy Materials

Glassy materials: thermodynamic and kinetic quantities 197
M.T. Clavaguera-Mora (Bellaterra, Spain)

Mass spectrometry investigation of the stability of the gaseous clusters in equilibrium with the metastable variety Ω-sulphur 206
M. Ezzine, R. Chastel and C. Bergman (Marseille, France)

Calorimetric measurements on some undercooled metals and alloys. 212
M. Baricco, L. Battezzati and P. Rizzi (Torino, Italy)

Composition and morphology of Fe–N off-equilibrium phases in a nitrided Fe–1.5wt.%Mo sintered alloy 217
M.R. Pinasco (Genova, Italy), G. Palombarini (Bologna, Italy), M.G. Ienco and G.F. Bocchini (Genova, Italy)

Intermetallic phases: Structure, Defects, Order–Disorder

Phase equilibria in the Al–Cr system 225
M. Audier, M. Durand-Charre, E. Laclau and H. Klain (Saint Martin d'Hères, France)

Magnetothermal investigation of the kinetics of defect reaction in the CoGa intermetallic compound 231
W. Frantz and R. Lück (Stuttgart, Germany)

Investigation of ordering and disordering in B-doped $Ni_{76}Al_{24}$ by residual resistometry 237
R. Kozubski and W. Pfeiler (Wien, Austria)

A contribution to the crystallochemistry of ternary 1:1:1 and 1:1:2 rare earth intermetallic phases with Pb and Pd 241
R. Marazza, D. Mazzone, P. Riani and G. Zanicchi (Genova, Italy)
